

C-24 45° Pres-Steel Precast Half Hanger

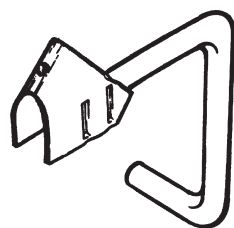

C-24 Type 4-AP

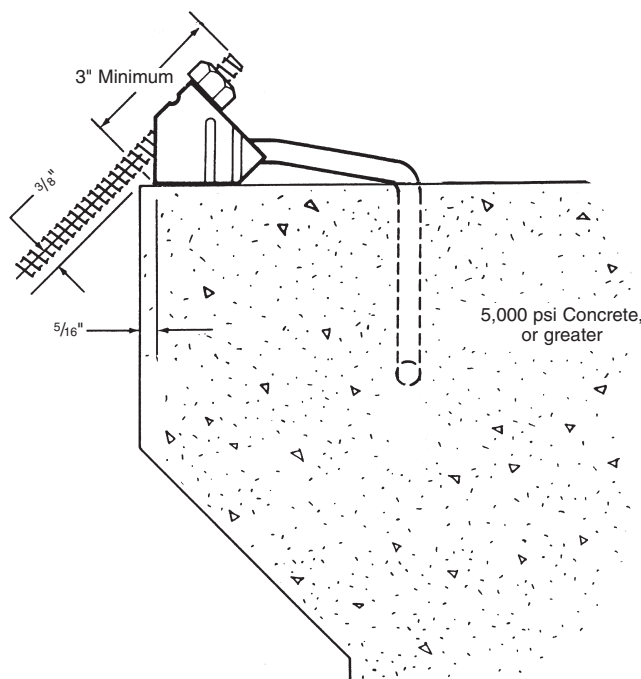

The C-24 45° Pres-Steel Precast Half Hangers are fabricated with a 45° 1/2" end section welded to a shaped strut. These units are designed to be cast into the top of a precast concrete beam and subsequently support the fascia overhang formwork. The C-24 45° precast half hanger is available in two styles.

C-68 45° Ty-Down Hanger		
Hanger Type	Safe Working Load	Bolt Diameter
4-AP	3,300 lbs.	1/2"
4-APR	6,000 lbs.	1/2"
5-APR	6,000 lbs.	3/4"

*SWL provides a factor of safety of approximately 2 to 1.
